

Steve Carlson, FCSI President

Steve approaches a project from what is practical, affordable and sustainable. He specializes in projects with short timelines, complicated renovations, and large-scale projects requiring complex organization and planning. His combination of creativity and sensibility is illustrated through his attention to detail and concern for quality—add that to his extensive industry knowledge, and it equals successful designs specific to each project.

He has experience in custom equipment fabrication, refrigeration systems, and millwork construction; this includes work in hotels, restaurants, private clubs, and cafeterias. Steve has worked in foodservice design and consulting since 1982, and is a very thorough design and customer service-oriented project manager with many long-term client relationships.
