

Christine Guyott, FCSI, RD

Principal

Christine began her life in foodservice by working in the Minneapolis restaurant industry through high school and college. Guyott is a registered dietitian with a Bachelor of Science in Nutritional Science from Pepperdine University and interned at Mayo-St. Mary's in Rochester, Minnesota. In 1995, Christine joined Rippe Associates and found a profession that combined her detailed dietitian skills with her foodservice operations expertise and allowed room for creative design.

While Guyott's main area of expertise is in healthcare foodservice design, she has worked on projects in various market segments throughout her career at Rippe Associates. With her combined expertise in dietetics and design, Guyott provides industry knowledge and brings a level of attention and understanding to projects that operators and architects value. Guiding clients through the design process as well as presenting to students and interns are some of Christine's favorite parts of her profession.
