

IOWA CITY, IOWA

# UNIVERSITY OF IOWA BURGE RESIDENCE HALL

## OPENING DATE

January 2005

## PEAK MEAL VOLUME

2800

## FINAL EQUIPMENT COST

\$2,200,000

## SCOPE

New Marketplace Dining Facility

This renovation and expansion project is the second marketplace dining facility on campus. The University wanted to plan this facility carefully to overcome challenges caused by the overwhelming increase in participation following construction of the first marketplace. Much time and effort went into projecting how many students, staff and visitors would utilize the facility.

The total foodservice space of over 26,000-square-feet includes receiving, bakery and storage facilities on the lower level. Priority was given to locating cold and hot food production centers on the main level with the serving area and increasing storage adjacent to each workcenter.

The serving area will accommodate a wide variety of menu concepts. The stations include: a pizza and pasta area, an oriental station, wok and fryer; a fresh Mexican counter with salsa bar, home cooking and rotisserie station, a chefs specials area, a three station grill counter; bakery and dessert displays; cereal, waffle, topping and condiment bars; and two large salad and deli islands. Each station has its own personality consistent with marketplace design.
