

ALLIANZ FIELD MINNESOTA UNITED FC
ST. PAUL, MN

This 23,000-seat stadium was built for the Minnesota United Football Club. This outdoor \$250 million stadium totals 346,000 SF of built space and features four premium hospitality clubs, 21 suites, 20 food carts, and 2,300 SF of retail.

Rippe Associates paired with S2O, a Chicago-based foodservice design consultant, in an effort to design all food and beverage facilities at the stadium. The design includes a commissary kitchen, field club, 10 concessions, 6 bars, pantries, and portables concessions. The Brew Hall + Kitchen, which includes a dual-sided 60' long beer tap tower, was designed to be open during regular business hours, to better serve the surrounding community.

The stadium was designed with environmental considerations including UV Exhaust Hoods, emphasis on public transportation, and recycles 2 million gallons of rainwater annually. The foodservice areas are approximately 27,900 SF and the equipment is valued at \$2,822,944.

Details

Opening Date: April 2019
Equipment Cost: \$2,822,944
Peak Capacity: 19,400

Project Size: 346,000 SF
