

GRAND CASINO MILLE LACS- BURGER BAR
ONAMIA, MN

This project was the first portion of a multi-phased masterplan. Grand Casino Mille Lacs was replacing their fine dining venue with a modern and fun environment while still utilizing their existing kitchen. A large bar was included in the project with the anticipation that alcohol would be allowed in the future. Also needed was the ability for the venue to serve an adjacent buffet, which was also under renovation.

The overall goal of the project was to increase visibility to the gaming floor and to change the dining concept from fine dining to a casual atmosphere. This phase of development took a dark corner of dead real estate changing it to a revenue generator as the space was opened up to the casino floor. It is now a vibrant and inviting space for the guests of Mille Lacs Grand Casino to enjoy.
